Below is a implementation of Graph Data Structure in C++ as Adjacency List. I have used STL vector for representation of vertices and STL pair for denoting edge and destination vertex.

Graph implementation C++ - Stack Overflow

I have a SSRS report with full of number fields. I would like to have that to be displayed as in one decimal. i tried to use F1. it gives me only one decimal points in html rendering, but in excel exported version it shows 2 decimal points.

How to do number formatting to 1 decimal point in SSRS?

E-Prime (short for English-Prime or English Prime, sometimes denoted É or E') is a version of the English language that excludes all forms of the verb to be, including all conjugations, contractions and archaic forms.

E-Prime - Wikipedia
